# SLIDING DOOR HARDWARE RANGE

# AUSTRAL YARRA RIDGE SLIDING DOOR LOCK

Reliable all-metal lock for aluminium sliding doors

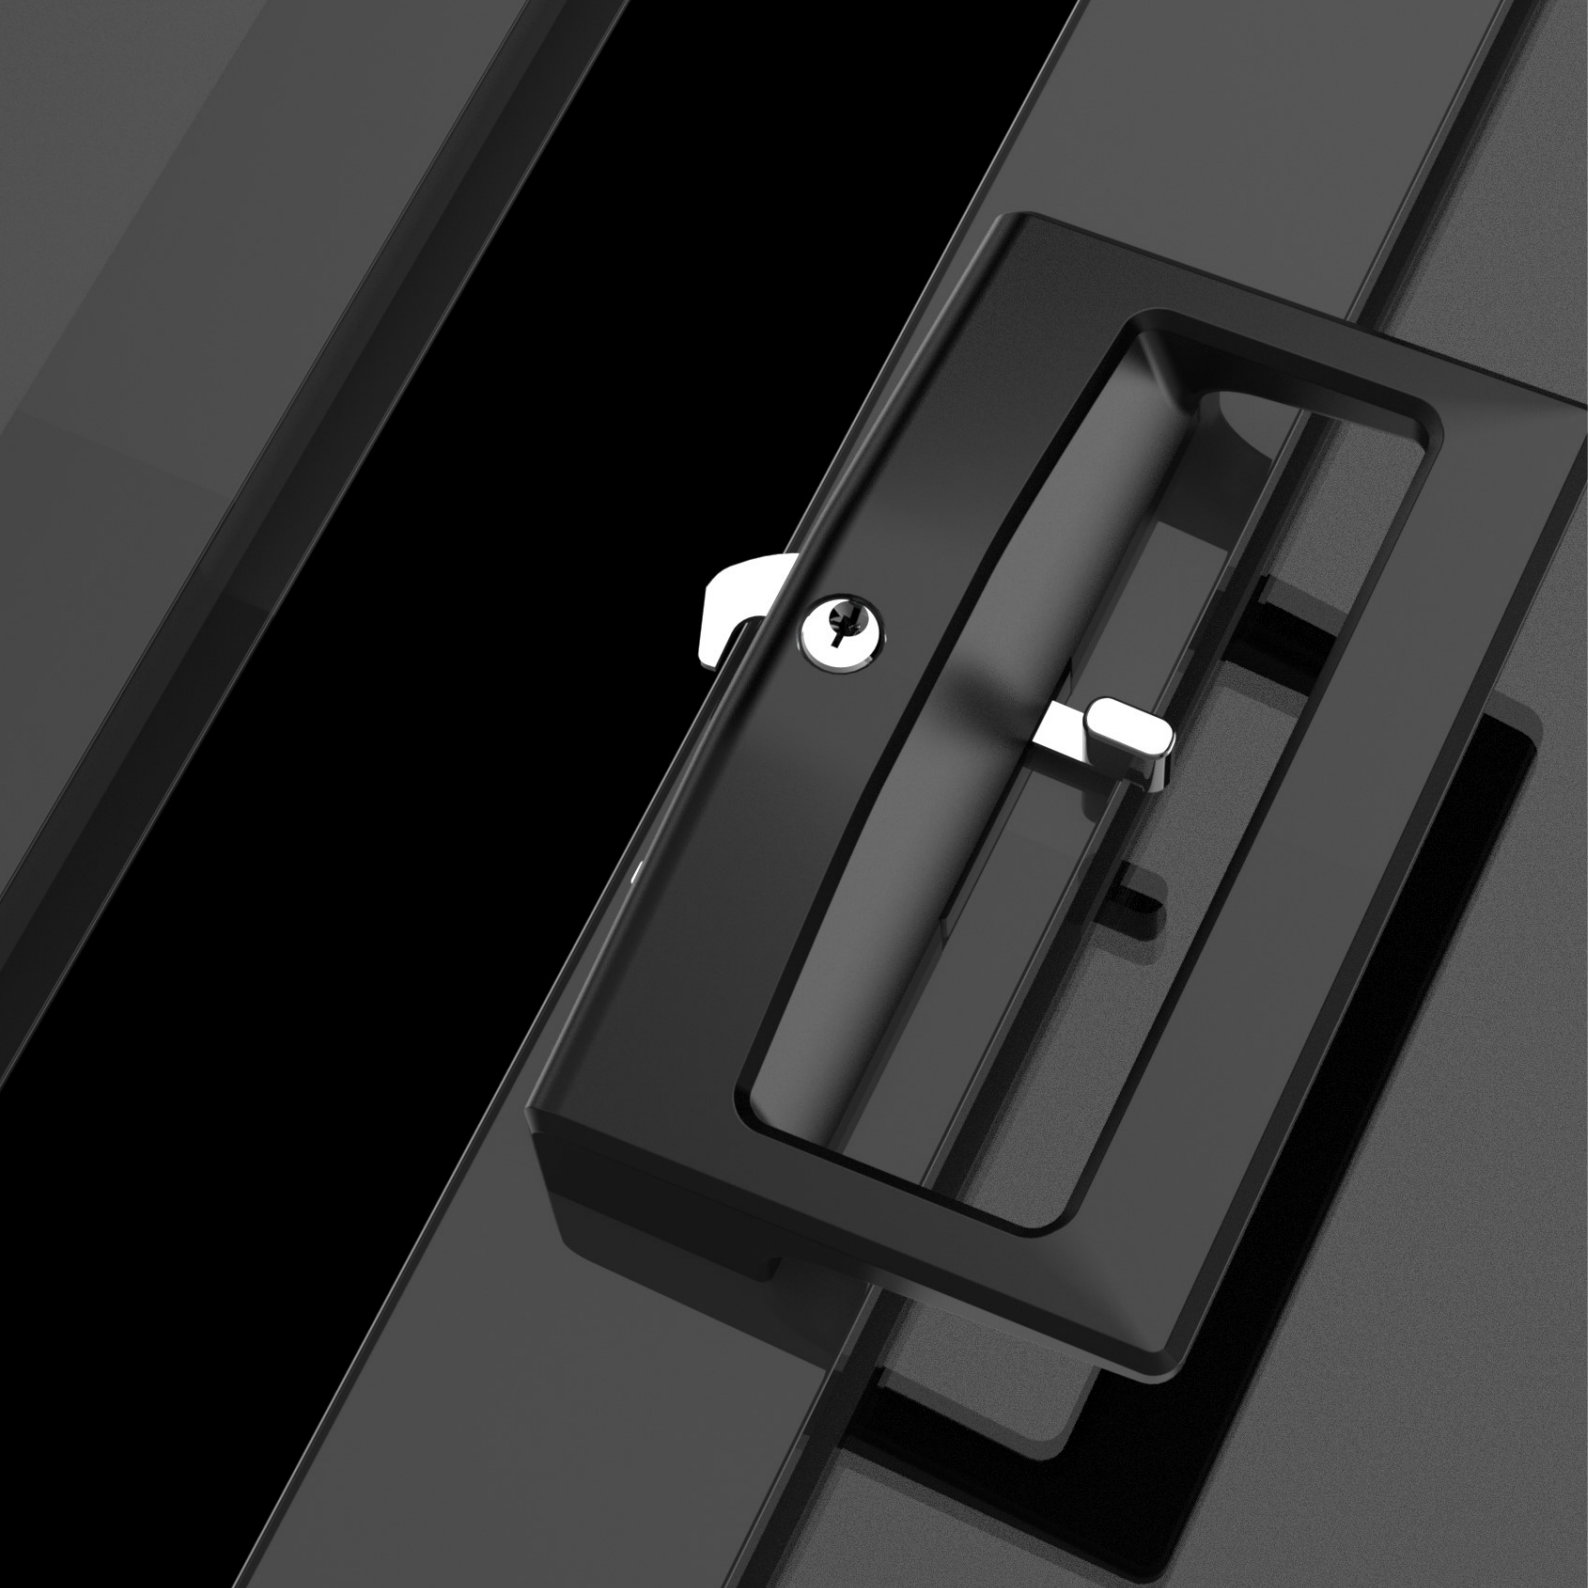

Once the door is closed, the twin beaks are operated by key or lever to engage the catch plate

## PRODUCT FEATURES

- Increased knuckle clearance to operate key: The lock cylinder is set 37mm from door-jamb when door is closed
- Twin counteracting beaks engage an all-metal catch plate, providing resistance to jemmying and restraining the door against being lifted from its rails
- Self-adjusting catch plate automatically compensates for building movement and door carriage wear, to ensure correct latching after continued use
- Anti-slam plunger prevents the door being shut with beaks extended, avoiding damage to beaks and catch plate
- Suits left-closing and right-closing doors (lock is not handed)
- Australian designed and manufactured
- Deadlock
- Available in single cylinder, double cylinder and no cylinder configurations

## FINISHES AVAILABLE

Black, White and Silver

# AUSTRAL YARRA ESSENTIAL SLIDING DOOR LOCK

The Yarra Essential is a contemporary design to complement modern interiors

## PRODUCT FEATURES

- Durable polymer handle
- Adjustable catch plate automatically compensates for building movement and door carriage wear to ensure correct latching after continued security and longevity
- Self retracting beak to prevent lockout
- Surface mounted, using industry standard cutout
- Suits left-closing and right-closing doors (lock is not handed)
- Available in single cylinder, double cylinder and no cylinder configurations
- Australian designed and manufactured

## FINISHES AVAILABLE

Black Only

# AUSTRAL YARRA VIEW SLIM SLIDING DOOR LOCK

An all-metal lock for sliding glass doors. Slim design for doors with a large stiffening wing or narrow frame.

## PRODUCT FEATURES

- Twin counteracting beaks engage an all-metal catch plate providing resistance to jimmying and restraining the door against being lifted from its rails
- Self-adjusting catch plate automatically compensates for building movement and door carriage wear to ensure correct latching after continuous use
- Anti-slam plunger prevents the door being shut with beaks extended, avoiding damage to beaks and catch plate
- Suits left-closing and right-closing doors (lock is not handed)
- Available in single cylinder, double cylinder and no cylinder configurations
- Australian designed and manufactured

## FINISHES AVAILABLE

Black, White and Silver

# DORIC EVOLUTION FLUSH MOUNT SLIDING DOOR LOCK WITH PULL

Designed for the high-end modern aesthetics

## PRODUCT FEATURES

- The DN1290 Aluminium mortice lock body features twin counteracting beaks to engage an all-metal catch plate providing resistance to jimmying and restrains the door against being lifted externally from its rails
- The DN194 D Pull is an elegant architectural styled pull handle ideal for residential living
- The DS575 Flush Pull Handle installed externally to allow for screens
- Latching mechanism on the internal furniture
- Incorporated anti-crash feature to prevent keeper damage
- Australian designed and manufactured

## PLEASE NOTE

Snib turn to inside—no key lock available

Not available on centre opening doors

## FINISH AVAILABLE

Black Only

# HINGE/PIVOT DOOR HARDWARE RANGE

# LOCKWOOD PALLADIUM #27 LEVER HANDLE

The Palladium Series represents a high standard in residential and semi-commercial door hardware and is brought to you through modern innovative designs, combined with quality manufacturing

## PRODUCT FEATURES

- Solid metal lever escutcheon
- The Palladium Series mechanism incorporates a lever handle torsion spring and shuttle mechanism which provides a positive feel and increased product life
- Australian designed and manufactured
- Available in single cylinder, double cylinder and no cylinder configurations
- Suits left-closing and right-closing doors (lock is not handed)

## FINISHES AVAILABLE

# GLASS SELECTION

# GLASS TONES AND PRIVACY RANGE

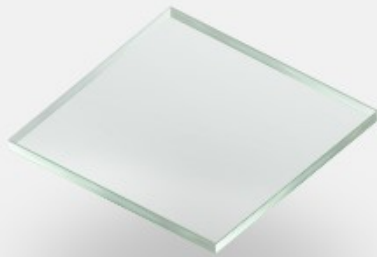

# VIRIDIAN VFLOAT™

Premium float glass – our foundation product for clear vision & quality

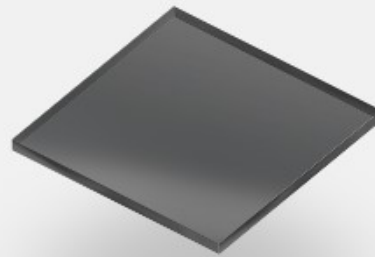

## PRODUCT FEATURES

- Further processed as toughened (VTough™), laminated (VLam™) or toughened laminate glass
- A selection of different thicknesses and tones available
- Suit general glazing requirements
- The vast majority of VFloat™ products are manufactured in Australia to leading local standards

### Clear

Choose VFloat™ Clear to enjoy uninterrupted views and maximise the natural light and warmth entering your space.

### Grey

Choose VFloat™ Grey to reduce solar heat and glare, and enjoy the subtle design look of a neutral grey hue.

# VIRIDIAN DÉCORSATIN™

Frosted etched glass for internal and external spaces - adding light and privacy

## PRODUCT FEATURES

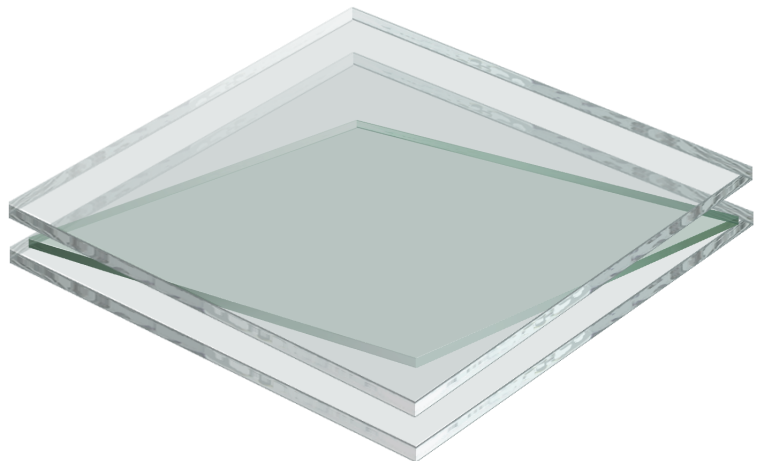

- DécorSatin™ is a high quality translucent glass that diffuses light to provide natural illumination whilst still maintaining privacy
- The satin matte finish of the DécorSatin™ range perfectly complements a sleek, modern design – suitable for both internal and external spaces
- DécorSatin™ is suitable for safety glass applications when toughened, also reducing the risk of thermal breakage
- DécorSatin™ has a high quality uniform acid etched surface, which transmits various levels of light dependent on glass tone.

# VIRIDIAN VLAM™ TRANSLUCENT

Translucent laminated glass for spaces which require privacy and natural light

## PRODUCT FEATURES

- The translucent .68MM interlayer between two pieces of glass provide the frosted appearance of VLam™ Translucent
- VLam™ Translucent glass stays in situ if broken. Making it suitable for safety glass applications and giving you added peace of mind
- VLam™ Translucent offers improved level of noise reduction compared to ordinary glass – so you can enjoy more peace and quiet in your space

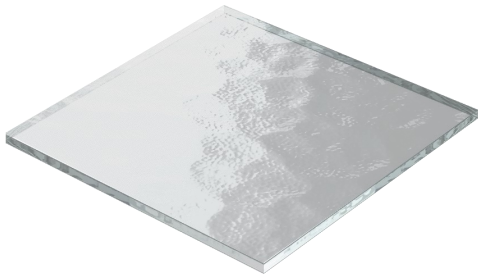

# VIRIDIAN DÉCORPATTERN™

Textured glass for spaces which require light and privacy.

## PRODUCT FEATURES

- DécorPattern™ diffuses the light that enters a space, transferring the very best qualities of natural light whilst blocking out onlookers
- DécorPattern™ offers a low-cost decorative touch to a room with a range of styles and visual effects to suit any setting
- DécorPattern™ range come with a consistent finish and high level of durability

# DOUBLE GLAZING RANGE

## **WHAT IS DOUBLE GLAZING?**

A double-glazed unit is two pieces of glass sealed with a spacer bar. The spacer bar is the strip you see in between the two pieces of glass. Before the unit is sealed, we fill it with argon gas. If you select double glazing for your project, GP Glass will order units to the sizes and specification required and install these units into your windows and doors

## **WHAT ARE THE BENEFITS?**

The double stacking of glass, and the argon gas in between, creates insulation which slows the rate of hot or cold coming in, or flowing out, of the home, keeping the home at a comfortable temperature for longer. This means you use less powered heating and cooling. This is good for your hip pocket, and for the environment. You can also choose better performing glass options to make up the unit for added benefits like privacy, increased insulation and acoustic comfort.

## **WHY VIRIDIAN?**

GP Glass choose to partner with Viridian due to their product range, quality, deliverability and service. Viridian have been supplying glass since 1856 and today are the largest processor in Australia.

# VIRIDIAN STANDARD DOUBLE GLAZING

Entry level to double glazing utilizing standard VFloat™, VTough™ and VLam™

## PRODUCT FEATURES

- Cost effective way to achieve better energy values than single glazing
- Double glazed units are manufactured locally in Hobart
- Available in 18 and 24mm units to suit our Synergy and Quantum frames
- Available with aluminium spacer as standard

## TONES AVAILABLE

4mm, 5mm, 6mm, 8mm, 10mm thick glass

Clear, and Grey

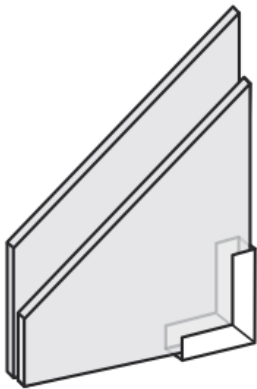

## IMPROVE YOUR HOMES ENERGY EFFICIENCY

Upgrade from our standard double glazing range to Viridian's LOW-E range. There are three stages you can choose from depending on your budget and energy requirements.

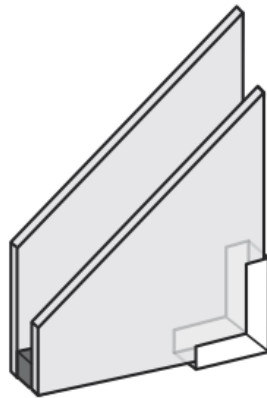

Choosing the wrong kind of glass can have a lasting impact on how you are able to enjoy your space.

Without glazing that offers strong solar control and thermal insulation, it can be difficult to mediate the temperature in your building. And people are never really comfortable if they are too hot or too cold. This means you could find yourself relying heavily on heating and cooling systems that cost you a fortune.

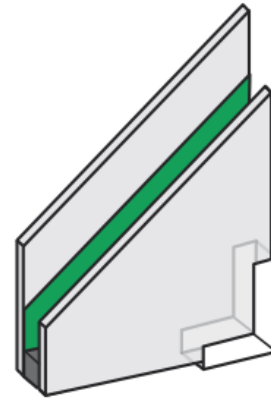

### Viridian ClimaTech™ DOUBLE GLAZING

### LightBridge™ DOUBLE GLAZING

### LightBridge next™ DOUBLE GLAZING

# VIRIDIAN CLIMATECH™

Viridian ClimaTech™ offers quality entry level performance double glazing for spaces which require additional insulation

## PRODUCT FEATURES

- Viridian ClimaTech™ uses two pieces of glass, one coated with a spectrally controlled Low E coating and the other an ordinary clear or toned glass. Providing added comfort and design flexibility
- Viridian ClimaTech™ allows you to use larger windows without facing building compliance challenges
- Viridian ClimaTech™ is supplied to Grade A safety standards when processed to the correct thickness and glass type to suit the application
- Available with aluminium spacer as standard

## TONES AVAILABLE

4mm and 5mm thick glass available in Clear only.

6mm thick glass available in Clear, Light Grey and Grey

# VIRIDIAN LIGHTBRIDGE™

LightBridge™ double glazing units curb the flow of heat in and out of your home to an unparalleled degree. This allows you to have expansive glazing whilst still achieving an energy efficient home

## PRODUCT FEATURES

- LightBridge™ allows for larger window spaces, opening up your home to more natural light and vaster views
- The LightBridge™ range provides superior insulation by limiting the transfer of hot or cold air through windows – making your home cooler in summer and warmer in winter
- LightBridge™ provides a range of tones widening your opportunity to choose the best glass type based on the needs of your project.
- Grey and light grey tones should be considered for windows in hot climates, sun-exposed elevations, and applications subject to high glare
- Privacy variants should be considered for bathrooms, bedrooms, windows adjacent to public areas and those subject to overlooking.
- Thermal spacer as standard

## TONES & PRIVACY AVAILABLE

Clear, Light Grey, Grey, DecorSatin and DecorSatin Grey

# VIRIDIAN LIGHTBRIDGE NEXT™

LightBridge next™ double glazed units control the flow of heat in and out of your home. The thermally efficient spacer technology, and addition of an acoustic performance interlayer, brings performance to the next level. Allowing you to have larger windows for optimal natural light, without compromising on thermal or noise comfort.

## PRODUCT FEATURES

- LightBridge next™ has improved thermal edge performance due to its non-conductive spacer. It also contains a specially formulated acoustic interlayer to reduce outside noise by 29%^ compared to ordinary 4mm LightBridge™
- The high performance materials which make up LightBridge next™ allow for larger windows, helping you meet design demands for more natural light and comfort
- The double glazing of LightBridge next™ has been tested to Grade A safety glass standards. It also contains UV protection, to prevent fading on furnishes and finishes
- Thermal spacer as standard
